Subject: NPS update?

Any update on getting DOI to free up VCDL's petition allowing citizens and off duty LEOs to have weapons in National Parks?

I haven't been able to get anything meaningful from the Department of the Interior or NPS. At this point, if they haven't responded to anything Congress has already sent them, I don't think there is any reason to believe that anything short of legislation will fix this.

There are several potential vehicles for this change, especially considering that the NPS regulation completely disarms off duty law enforcement as well. VCDL's petition fixes this problem. In an era of possible terrorist attacks, the last thing Americans want is to feel less safe.

Can we get the petition's changes attached to an active bill in Congress?

Thanks,

Dave *****
